

Driver-ZED® 3.0 (computer game)

Interactive Risk-Management Training DVD (2005, 2 hours of fun, interactive material designed for teens)

An aggressive tailgater. A busy highway work zone. A child chasing a ball into the street. These are just a few of the many situations in which a bad decision—or indecision—can lead to tragic consequences. Driver-ZED® 3.0, an engaging, innovative and entertaining DVD helps teens learn how to identify and manage these types of risks.

Featuring live-action video, Driver-ZED® puts teens to the test in 100 highway, city, country and work zone scenarios. Most novice drivers would need about two years of actual driving to acquire these valuable experiences. The program features over 25 animated tips on important driving topics, such as zero tolerance laws and night driving.

Enabled to run from a server on a Windows network, Driver-ZED® includes a self-contained teaching module for driving instructor use in the classroom, as well as parent and student guides.

RECOMMENDED SYSTEM SPECS

- Intel Pentium III 1ghz processor
- Windows XP/Vista operating system
- 256 MB RAM, 120 MB hard disk space
- 4x DVD-ROM Drive

If the DVD does not work correctly on your computer, you can return it for a full refund of the purchase price. You are responsible for the cost of return shipping to:
AAA Foundation for Traffic Safety, 607 14th Street, NW, Suite 201, Washington, DC 20005.

Driver-ZED® was developed in response to a serious need for better training of teen drivers—sixteen-year-olds have 10 times the number of crashes per mile as the average driver. AAA Foundation research identified inappropriate risk management as one of the key contributors to this tragically high crash rate. The AAA Foundation hopes that this product can help reduce teen driver crashes, but assumes no liability for its use or misuse.

Children in Traffic DVD

(1999, 13:10, Adults)

Updated and revised, this is one of AAA Foundation's classic videos that shows how children see the road differently from adults and provides critical insight on why children behave unexpectedly. How does children's development affect their perception of traffic? What behaviors should adults watch for when driving around children? This must-see DVD for all drivers and parents presents real-life footage in an interesting and informative format.
